CHERRY MX Low Profile RGB Red MX1B-L2NA

High-precision CHERRY MX switch especially engineered for notebook or low profile desktop applications

Key benefits:

- · Engineered and Made in Germany
- CHERRY MX Low Profile RGB Red switch: Without pressure point, linear light actuation switching function with a defined force of approx. 45 cN without contact feedback
- Designed for use with SMD LEDs (RGB or single colour)
- More consistent lighting throughout the keycap due to optimized switch design
- Option to use all 16.8 million RGB colours in high luminosity (scope of supply does not include LED)
- SMD LEDs directly mounted on the circuit board for cost-efficient, fully automated production
- High-precision mechanical switch with very low operating point tolerance
- World exclusive CHERRY Gold Crosspoint technology
- Short bounce time for high switching frequency (such as for fast typing)
- Self-cleaning contacts
- Switch resistant to dust and dirt
- Over 50 million keystrokes with no loss of quality guaranteed

Technical Data:
